

Project Design Phase-I Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID34173
Project Name	A Novel Method For Handwritten Digit Recognition System
Maximum Marks	4 Marks

Solution Architecture of Handwritten Digit Recognition Systems:

Handwritten digit recognition is the ability of a computer to recognize the human handwritten source.

There are number of ways and algorithms to recognize handwritten digits, including Deep Learning / CNN, SVM etc.

The speech and handwriting recognition are among novel methods of exchanging ideas or information between computers and its users.
